

COVID-19 Testing

Protect your employees and limit outbreaks.

Testing can quickly identify positive COVID-19 cases among your staff and help limit the spread.

Encourage staff to:

- Request a home PCR test from scanpublichealth.org.
- Visit mobile and permanent testing sites. Find testing locations at tpchd.org/covidtest.

Offer test kits to your staff.

We have a limited supply of take-home PCR and rapid antigen test kits available to partners for free. [Request kits at tpchd.org/covidtest](https://tpchd.org/covidtest).

COVID-19 vaccine information:

tpchd.org/covid19vaccine

Check your phase eligibility:
